About Me

A recent graduate in Computer Engineering and Artificial Intelligence from the Faculty of Engineering and Technology, with experience in developing mobile applications using Flutter and applying Artificial Intelligence and Machine Learning to solve real-world problems. Skilled in creating innovative solutions, such as license plate detection systems, and leading workshops to teach foundational app development concepts. Passionate about exploring emerging technologies and continuously improving in the fields of artificial intelligence, mobile application development, and data analytics.

Experience

- Ranked 5th representing Walailak University in the Robo Master competition in 2024.
- Developed a weather application using Flutter, providing real-time weather updates and forecasts.
- Led a workshop on building a pizza ordering app with Flutter, teaching participants the basics of mobile app development and UI design.
- Developed a license plate detection and recognition system using CiRA Core AI, enabling vehicle entry and exit tracking in dormitory areas

Programming Languages

• Java

• Dart

• Python
